Skills

Languages: JavaScript/TypeScript, Java, Python, Bash

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend & DevOps: Linux, Node.js, Express.js, SQL, MongoDB, AWS, Docker, Git, CI/CD

Professional Summary

Software Engineer with 2 years of professional experience, transitioning into Cloud and DevOps. Hands-on experience with AWS, Docker, Linux, CI/CD, Bash scripting, and application deployment, backed by a BSc (Hons) in Computer Networks. Strong software development background in JavaScript/TypeScript, Node.js and Java.

Work Experience

Associate Software Engineer — Skalafy (Pvt) Ltd

Jun 2024 - Jan 2026

Socialic - Social Media Management Platform

- Developed an AI-powered content suggestion feature within a SaaS-based multi-platform social media management system, enabling automated post recommendations.
- Implemented end-to-end feature functionality using Next.js for the frontend and Express.js for backend APIs.
- Improved content creation efficiency by reducing manual effort and enabling AI content generation across platforms.

Anytask - Marketplace Platform

- Built a service marketplace application using React Native, connecting clients with construction and home service providers.
- Implemented authentication flows, RESTful API integration, and contributed to backend development for core app features. Integrated payment processing using Genie and implemented push notifications, analytics, and crash reporting using Firebase (FCM, Analytics, Crashlytics).

Voclix - AI English Learning App

- Developed an AI-powered English learning platform using React Native, featuring speaking practice, writing assistance, and vocabulary training modules. Implemented end-to-end authentication using AWS Cognito, ensuring secure and scalable access control.
- Built offline-first functionality with SQLite and integrated push notifications, analytics, and performance monitoring for improved user engagement.

Trainee Software Engineer - Ceydigital Solution(Pvt) Ltd

Sep 2023 - Apr 2024

- Completed a 6-month internship, with 3 months focused on Web Development and 3 months on Game Development using Unity (C#), contributing to internal projects and prototypes.
- Developed Unity-based game prototypes while also building frontend components with React/Next.js and backend REST APIs using Node.js and Express.js during the web development phase.

Education

BSc (Hons) Computer Networks

Sep 2025 - Sep 2026

University of Wolverhampton

Electronic & Telecommunication Engineering Technology(Merit)

2020 - 2024

Institute of Technology University of Moratuwa

Languages

English (Professional Working Proficiency), **Sinhala** (Native)
